Complimentary Live Webinar:
MPI 2: The Value of MPI

March 27 at 9:00 p.m. Pacific Time

ASNC and IAEA bring you the second in a series of free MPI webinars. This webinar is designed to increase cardiologists, radiologists, and nuclear medicine physicians’ knowledge of myocardial perfusion imaging (MPI).

Samuel Wann, MD, MACC, FASNC, Wisconsin Cardiovascular Group, Columbia St. Mary’s Healthcare Milwaukee, and Jamshid Maddahi, MD, FASNC, Clinical Professor, Molecular & Medical Pharmacology, UCLA School of Medicine, will review how MPI is a leading tool in the diagnosis and prognosis of CAD.

Register For This Complimentary Webinar Today!

✓ Check Corresponding Date And Time In Your Area Or Country!
✓ No International Calling Fees!
✓ Limited Registration Available so Register Early!

Offered as part of a joint educational series between ASNC and IAEA, this live, interactive format allows participants to evaluate and assess their skills and improve their knowledge of MPI and its applications and value in cardiac diagnosis and prognosis.

Learning Objectives:

■ How does the information from an MPI help inform patient management decisions?
■ How do you evaluate the selection of MPI when also considering other imaging modalities?
■ When are referrals appropriate?
■ How does MPI fit into the cardiac testing continuum?
