IAEA/ESNM Webinar Series on basic NM

Introduction to Infection & Inflammation Imaging

Target audience

Nuclear physicians, Radiologists and residents, Radiobiologists, Radiopharmacists, Radiographers and technologists with limited experience in the use of nuclear medicine techniques for infection and inflammation imaging

Description

This is an introductory webinar, introducing the viewer to imaging infections and inflammation with nuclear medicine techniques. While infection and inflammation are commonly encountered in the clinical scenario, the use of nuclear medicine techniques within the treatment algorithm can be further enhanced. This introduction covers the pathophysiology leading to the choice of radiopharmaceuticals available and the clinical scenarios where these can be effectively used.
