

IAEA/ESNM Webinar Series on basic NM

Stress Testing Protocols

Learning Objectives

The objective of this webinar is to provide the participant with a concise overview of the different stressors and protocols available for myocardial perfusion imaging:

1. Understand the principle of exercise stress testing
2. Understand the importance of target heart rate in exercise stress testing
3. Know the different pharmacological stressors
4. Knowledge of the protocols associated with the different stressors
5. Knowledge the frequency of severe side effects in stress testing
6. Be able to select the most appropriate protocol for an individual patient
