

IAEA/ESNM Webinar Series on Paediatric NM

Cortical (static) renal scintigraphy and radionuclide cystographies

Target audience

The aim of this webinar is to lead Nuclear Medicine trained specialist with a low level experience in pediatric application to understand technique and meaning of cortical and cystographic radionuclide studies in children's febrile UTI

Description

The webinar is organized through 5 steps:

- ✓ description of basic technique of the exams and how to get rid of some practical problems
- ✓ clinical application and diagnostic accuracy
- ✓ actual position of radionuclide studies into the published clinical guidelines and the areas of controversy about their use.
- ✓ Clinical cases
- ✓ Take home messages
